MISSION

To provide leadership in the continued evolution of the New Zealand transport industry by providing exceptional products, service and support.

QUALITY ON THE MOVE

Transpecs is the leading New Zealand supplier of OEM truck and trailer components and is unique in its ability to provide a 'one-stop-shop' service to trailer builders and the new truck sales industry.

Founded in 1953, Transpecs has a strong position in the marketplace. It's core business is supplying world class branded product directly to trailer manufacturers and truck body builders. A nationwide service network of distributors supply spare parts to all major national and regional transport operators.

Transpecs delivers a complete product and service offering. This allows commercial transport clients to access the best range of transport equipment,

exceptional service and advice , which customers have come to expect from the company over many years.

The Transpecs' team features people who are the very best in the industry, with expertise encompassing the company's comprehensive range of running gear, transport equipment, braking and hydraulics.

Transpecs does more than just offer clients high quality transport components and accessories. As an organisation, they're committed to helping the industry grow by adding value to the equipment they sell and to the services they supply.

Transpecs: quality on the move.

RUNNING GEAR

Transpecs offers the most comprehensive axle and suspension range on the road today.

They have gone to great lengths to source and design running gear, in partnership with their global suppliers, to offer the best solution for any application in New Zealand.

PRODUCT RANGE

- Air Suspensions
- Disc Braked Axles
- Drum Braked Axles
- Integrated Axles & Suspensions
- Mechanical Suspensions
- Steering Axles

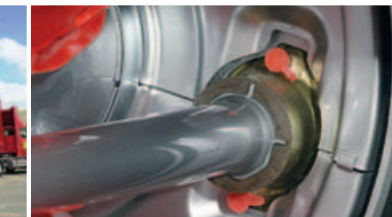

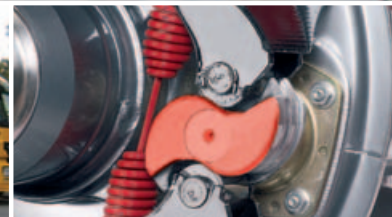

Axle and suspension systems are at the heart of all trucks and trailers, and the products marketed by Transpecs are the best available.

Transpecs offer both European (SAF) and North American (IMT & Reyco) style products to meet the rigorous demands of the New Zealand transport industry.

The product range encompasses a package of axles, in disc and drum brake configuration, modular axle and suspension combinations, and fully integrated and fixed beam models.

In-house facilities enable Transpecs to build axle beams into a wide range of axles. This ability greatly increases the range of wheel sizes and fixings available.

Expert advice and support is behind every product, ensuring end users are able to minimise tare weight and optimise productivity and whole-of-life value.

BRAKING

From braking kits and foundation braking, through to the latest ABS and EBS technology, Transpecs lead the way in braking equipment and expertise.

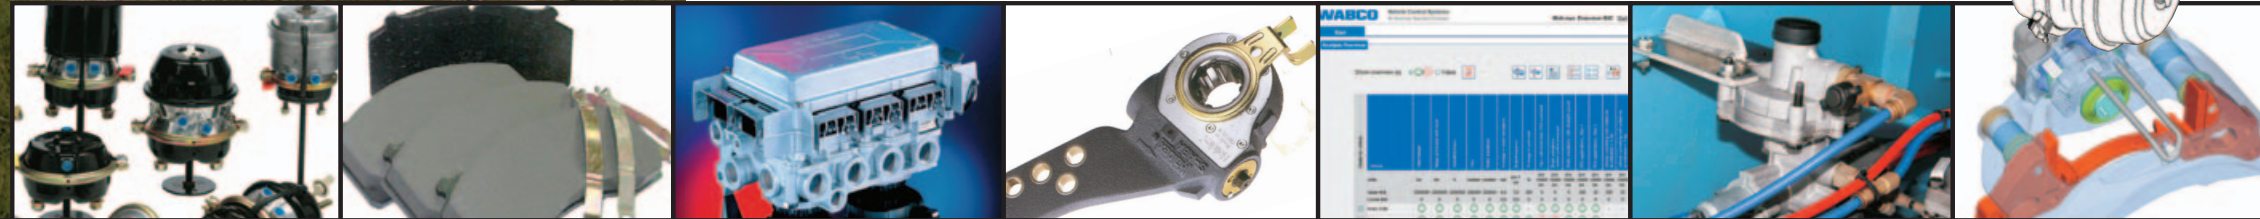

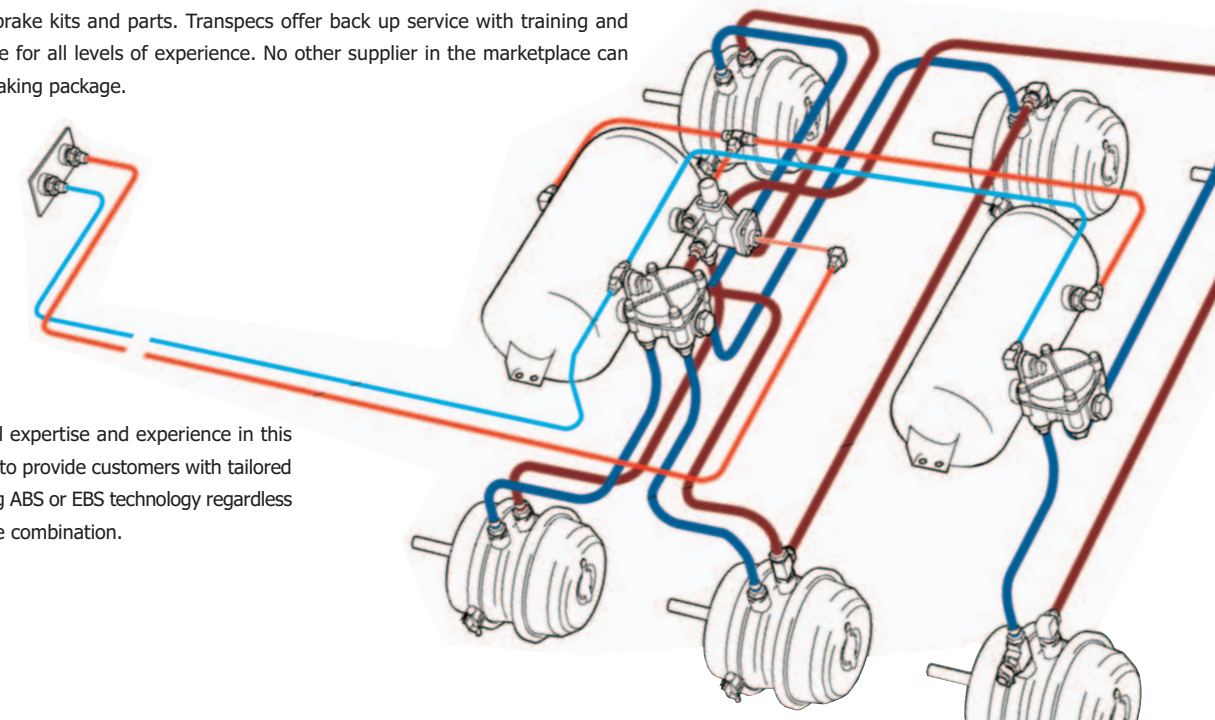

Superior braking performance is critical, not only for improved driver safety and stopping distances, but also to maximise the life of your trailer and associated components.

Transpecs supply the complete braking package from the world's leading brands, including our tailored ADR approved brake kits and parts. Transpecs offer back up service with training and technical advice available for all levels of experience. No other supplier in the marketplace can offer such a complete braking package.

Thanks to their technical expertise and experience in this area, Transpecs are able to provide customers with tailored braking solutions including ABS or EBS technology regardless of your voltage or vehicle combination.

PRODUCT RANGE

- Anti-lock Braking Systems (ABS)
- Brake Coding Services
- Complete Brake Kits and Parts
- Drum or Disc Brakes
- Electronic Braking Systems (EBS)
- Roll Stability Support (RSS)
- Spring Brakes
- Valves

HYDRAULICS

Transpecs offer an unprecedented range of hydraulic products and services, encompassing the complete gamut of transport hydraulics.

From tipping trailers to specialised custom requirements, Transpecs provides hydraulic equipment for a wide range of applications, and products from some of Europe's best known hydraulic manufacturers.

Hydraulic components from OMFB of Italy provide a comprehensive and powerful solution to the demands of the modern transport industry. Edbro UK are, without question, one of the world's leading tipping hoist manufacturers. Other products distributed include tail lifts, and electro-hydraulic power packs.

PRODUCT RANGE

- Controls
- Gear Pumps
- Hoists
- Hook Loaders
- Piston Pumps and Motors
- Power Take-Offs
- Powerpacks
- Tail Lifts
- Tipping Kits
- Truck Mounted Cranes
- Valves

TRANSPORT EQUIPMENT

Transpecs provides a diverse range of quality ancillary equipment, with products sourced from their global supplier network.

Transpecs supply well known brands such as Ringfeder, Holland, Rothe Erde and Alcoa to ensure customers have the widest choice of product to suit every budget and operation.

Transpecs is actively involved with their supply partners in Europe, America and Asia, continually developing products that are uniquely designed and manufactured with New Zealand operating conditions in mind.

Transpecs provides industry-leading accessibility to spare parts and support through their national service network of distributors.

So no matter what region of New Zealand you may operate in, there is full parts back up and advice when-ever and where-ever you need it.
